

Our largest scale project yet, a large financial institution sought 1,800 Frosted Acrylic Panel Extenders in order to retrofit their office to increase privacy and decrease workplace noise distractions. Said Dawn Rhodes of [Contract Office Group](#), “Everyone who helped facilitate a project of this scale at Obex was great to work with. The team went above and beyond to ensure each panel was constructed and retrofitted with precision. There is no team member at Obex that wouldn’t go the extra mile so that all parties are satisfied at the end of the day. We worked with Obex after realizing the original cubicle walls ordered were not going to

provide enough privacy. Obex supplied a high-quality remedy that was also far less expensive both from a product cost and labor installation perspective. The alternative would have meant disrupting the occupants as we disassembled the desks and took out the cubicle panels to install glass toppers from the original work station manufacturer. The ease in

which these panel extenders were able to fit onto our existing walls was a pleasant surprise. Now, with Obex’s help, each individual in this office can have the quiet and privacy when they need it, which they hope will create more focused, productive employees. The ROI is incredible. Few other office furniture solutions have such a positive impact on employee output,” said Rhodes.

For your next job, big or small, retrofit or designing an office from scratch, let Obex be your privacy and noise suppression solution. Panels made custom to fit your exact needs, we complete every design with your workplace’s aesthetic and productivity in mind. Whether you’re operating a

traditional cubicle office setup and could use more privacy in between employees, or are trying to segment a modern open office, Obex has over 25 panel fabric color options, 3 polycarbonate colors, and 2 acrylic options. You can be sure Obex will do everything possible to blend our products in with your current office environment.
